

DAY ONE *work progress*

Fast Toilet Snaking

01

Branding Identity

Brand Overview

Fast Snaking Services was built to feel different from traditional plumbing brands. Instead of looking overly industrial, corporate, or intimidating, the identity was designed to feel approachable, modern, friendly, and instantly understandable. The overall direction combines playful visuals with practical service communication. The goal is to help customers immediately understand what the business does while also making the brand memorable on social media, local advertising, and digital marketing platforms. The visual system was intentionally designed to feel: Fast and responsive Residential and homeowner-friendly Clean and trustworthy Social-media ready Easy to recognize at first glance “Fast fixes without the stress.”

Logo

The logo was designed to communicate the service category immediately while still maintaining a unique and recognizable shape. The main logo structure combines multiple visual ideas into one cohesive symbol: Toilet Silhouette – Represents the company’s primary focus on toilet unclogging and snaking services. Water Droplet Shape – Symbolizes plumbing, water systems, drainage, and fluid movement. House Structure – Created using pipe-inspired elements to reinforce residential home services. Rounded Typography – Creates a friendly and approachable personality rather than a cold industrial appearance. The logo should always appear clean, bold, and highly readable even at smaller sizes.

Logo Usage

Logo Usage Guidelines Maintain consistent spacing around the logo at all times. Never stretch, skew, rotate, or distort the logo. Always use high contrast between the logo and the background. Preferred usage is on the mint background (#b6e8e6) or white. The coral accent color (#f05d62) should remain the primary highlight color. Avoid placing the logo over highly detailed backgrounds. For social media, maintain enough padding to keep the logo visible even in profile circles.

Logo placement in facebook posts.

avoid placing logo in detailed backgrounds

atleast 20 pixels gap around content

For social media posts in facebook, logo placement should be on the top, with a 70% opacity to reduce eye attention to the logo but also maintaining ownership. Avoid placing the logo directly in the center of promotional graphics unless necessary for branding campaigns or announcements. The logo should never compete with the main headline or call-to-action. Content hierarchy must always prioritize the message first before branding. Keep logo sizing proportional across all content to maintain consistency throughout the brand ecosystem.

Typography Guidelines

Typography plays a major role in shaping the brand personality. Fast Snaking Services uses a bold headline font combined with a soft modern supporting typeface to balance personality and readability.

PRIMARY TYPEFACE : WEDGES

Used for logos, headlines, promotional graphics, and attention-grabbing content. This font gives the brand a playful, bold, and energetic personality that matches the fast-service positioning. Font was chosen because of it's appealness towards Philadelphia Moms. Philadelphia Moms tend to click at posts that don't remind them of corporate based plumbing that charge twice as much without getting work done.

**TOILET CLOGGED?
GIVE US A CALL!**

- letter spacing must be -62
- outline effect with a border of 105 for thickness
- border color must be: #ffffff

secondary typeface: quicksand

Quicksand is used for: Captions Descriptions Educational posts Service details Website and supporting content

Why it works: Maintains readability across digital platforms
Feels clean and modern Balances the playful headline typography Improves accessibility and readability

Typography guidelines

Typography Rules Do not use more than two font families in official materials. Headlines should remain bold and easy to scan quickly. Maintain consistent spacing between headline and body text. Avoid using overly thin text weights. Use sentence case for most captions to maintain a friendly tone. Avoid excessive uppercase usage except for urgent CTA messaging.

Color Palette Guidelines

The Fast Snaking Services palette was designed to feel clean, modern, memorable, and highly visible across social media and digital marketing. The palette balances freshness and urgency. Two emotions that are important in emergency plumbing services.

Color	Hex Code	Purpose	Emotional Role
Mint Blue	#bfe4e3	Primary Background	Freshness, Cleanliness, Trust
Coral Red	#e5757	CTA, Headlines, accents	Urgency, speed, attention
White	#ffffff	Spacing and Balance	Clarity and Consistency

Tone & Copywriting guide

The Fast Snaking Services voice should feel human, fast, direct, and approachable. Customers dealing with clogged toilets or drainage issues are already stressed, the brand voice should reduce panic instead of adding pressure.

Brand Personality

The brand voice should sound: Friendly Fast-moving
Reliable Simple and understandable Helpful rather than
overly sales-focused Confident but not arrogant

WE ARE HERE TO HELP UNCLOG YOUR TOILETS FAST.

AVOID
SOUNDING
OVERLY SALES
FOCUSED

FOCUS ON
HELPING AND
REMINDING
THEM OF THE
MONEY BACK
POLICY

BE
SYMPATHETIC
TO PHILLY
MOMS

Copywriting Style

Use short and direct sentences. Write like a local service provider, not a corporation. Use relatable homeowner language. Avoid technical plumbing jargon whenever possible. Focus on reassurance and speed. Keep captions conversational and easy to read.

Avoid overly technical or corporate jargon to keep the brand simple, approachable, and customer-friendly.

Brand Positioning

Fast Snaking Services positions itself as a fast-response residential toilet snaking and unclogging service designed for busy modern households. The brand focuses on providing quick, stress-free, and approachable plumbing assistance for homeowners who need immediate help.

Unlike traditional plumbing companies that often feel overly corporate or intimidating, Fast Snaking Services focuses on:

- Fast response times
- Friendly and easy communication
- Strong social media accessibility
- Modern and relatable branding
- Community-focused content marketing

The brand identity is designed to feel trustworthy, approachable, and easy to contact — especially for moms and families managing household emergencies.

The primary target audience includes:

- Philly moms managing busy households
- Homeowners needing urgent toilet unclogging help
- Apartment residents
- Young families
- Renters dealing with unexpected plumbing issues
- Customers looking for quick and hassle-free emergency assistance

Business Positioning

I already joined and started posting in Facebook groups related to Philadelphia to build local visibility and connect directly with potential customers.

Moving forward, I'll continue increasing activity within these groups by posting more consistently, responding to inquiries faster, and improving call-to-actions to encourage direct messages and service bookings.

The strategy focuses on generating organic local leads by creating relatable, community-friendly content that feels natural within the groups rather than overly promotional.

This includes:

- Posting relatable homeowner plumbing situations
- Using urgency-focused but approachable captions
- Creating engaging visual content optimized for Facebook groups
- Strengthening trust through consistent interaction and replies
- Encouraging direct inquiries through simplified CTAs
- Building local brand familiarity within Philadelphia communities

The overall goal is to position Fast Snaking Services as a recognizable and trusted local solution for toilet clogging and emergency snaking services within Philadelphia neighborhoods.
